- Appendix B: Further project information

Welcome to the report of results and recommendations for the 2016 State-wide Local Government Community Satisfaction Survey for Greater Dandenong City Council.

Each year Local Government Victoria (LGV) coordinates and auspices this State-wide Local Government Community Satisfaction Survey throughout Victorian local government areas. This coordinated approach allows for far more cost effective surveying than would be possible if councils commissioned surveys individually.

Participation in the State-wide Local Government Community Satisfaction Survey is optional and participating councils have a range of choices as to the content of the questionnaire and the sample size to be surveyed, depending on their individual strategic, financial and other considerations.

The main objectives of the survey are to assess the performance of Greater Dandenong City Council across a range of measures and to seek insight into ways to provide improved or more effective service delivery. The survey also provides councils with a means to fulfil some of their statutory reporting requirements as well as acting as a feedback mechanism to LGV.

This survey was conducted by Computer Assisted Telephone Interviewing (CATI) as a representative random probability survey of residents aged 18+ years in Greater Dandenong City Council.

Survey sample matched to the demographic profile of Greater Dandenong City Council as determined by the most recent ABS population estimates was purchased from an accredited supplier of publicly available phone records, including up to 10% mobile phone numbers to cater to the diversity of residents within Greater Dandenong City Council, particularly younger people.

A total of n=400 completed interviews were achieved in Greater Dandenong City Council. Survey fieldwork was conducted in the period of 1st February – 30th March, 2016.

The 2016 results are compared with previous years, as detailed below:

- 2015, n=400 completed interviews, conducted in the period of 1st February 30th March.
- 2014, n=400 completed interviews, conducted in the period of 31st January 11th March.
- 2013, n=400 completed interviews, conducted in the period of 1st February 24th March.

Minimum quotas of gender within age groups were applied during the fieldwork phase. Post-survey weighting was then conducted to ensure accurate representation of the age and gender profile of the Greater Dandenong City Council area.

Any variation of +/-1% between individual results and net scores in this report or the detailed survey tabulations is due to rounding. In reporting, '—' denotes not mentioned and '0%' denotes mentioned by less than 1% of respondents. 'Net' scores refer to two or more response categories being combined into one category for simplicity of reporting.

5

Within tables and index score charts throughout this report, statistically significant differences at the 95% confidence level are represented by upward directing blue and downward directing red arrows. Significance when noted indicates a significantly higher or lower result for the analysis group in comparison to the 'Total' result for the council for that survey question for that year. Therefore in the example below:

The state-wide result is significantly higher than the overall result for the council. \geq

Appendix B.

The result among 50-64 year olds is significantly lower than for the overall result for the council. \geq

Further, results shown in blue and red indicate significantly higher or lower results than in 2015. Therefore in the example below:

- The result among 35-49 year olds in the council is significantly higher than the result achieved among this group \geq in 2015.
- The result among 18-34 year olds in the council is significantly lower than the result achieved among this group in \geq 2015.

Overall Performance – Index Scores (example extract only)

Further Information

Further information about the report and explanations about the State-wide Local Government Community Satisfaction Survey can be found in <u>Appendix B</u>, including:

Contacts

For further queries about the conduct and reporting of the 2016 State-wide Local Government Community Satisfaction Survey, please contact JWS Research on (03) 8685 8555.

- Performance remained relatively **stable** across core measures between 2015 and 2016. Performance exhibited a **slight** (but not significant) **decline** on the measure of **Overall Council Direction** (index score of 61, -4 from 2015); ratings are within one point of 2015 results on all other core measures.
 - Council performance is in line with or ahead of average ratings for Metropolitan Councils on all core measures, significantly exceeding Group averages for the measures of **Community Consultation** (62 for Council and 58 for the group), Lobbying (61 vs 56) and Council Direction (61 vs 55).
 - Greater Dandenong significantly exceeds State-wide averages on all core measures, leading the State by six to 12 index points on every measure.
- The **Overall Performance** index score of 65 is in line with 2015 results. All \geq demographic and geographic groups award Council positive ratings (an index score of 60 or above) for Overall Performance, though the **highest ratings occur among** residents aged 18 to 34 years (69) and Springvale residents (68). Conversely, ratings are lowest among residents aged 35 to 64 years (61 among 50 to 64 year olds and 60 among 35 to 49 year olds).

- Geographically, residents differ somewhat in their impressions of Council. Dandenong Area residents (62) rate Council lower for Overall Performance than their counterparts in Noble Park/Keysborough (66) and Springvale (68).
- Results are consistent with 2015 ratings among all groups with the exception of residents aged 50 to 64 (61, -5) and Dandenong Area residents (62, -4) who declined *slightly* in their impressions.
- Overall Council Direction dropped four points in the past year from an index score of 65 in 2015 to 61 in 2016. Council Direction still remains out front of the Group and State-wide averages for this measure.
 - Ratings declines were largely driven by residents aged 65+ (index score of 58, -9 index points) and residents aged 35 to 49 (50, -15). Both groups declined the most in their impressions of Council Direction in the past year and rate Council lowest on this measure compared to other groups.
 - Despite slight slippage on this measure the vast majority of residents continue to believe Council's performance has improved (30%) or stayed the same (54%); only 10% believe it has declined.

- Performance ratings on Lobbying and Community Consultation have higher levels of 'don't know' responses than other core measures (24% and 15% respectively). This suggests that a lot of the community is not hearing what Council is doing in these areas.
- Greater Dandenong City Council continues to perform most strongly in the area of Customer Service (index score of 76). Council has managed to maintain high ratings since 2012. Two in five (42%) rate Council's Customer Service as 'very good', with a further 35% rating Customer Service as 'good' (10% 'average' and 10% 'very poor' or 'poor').
 - That said Customer Service ratings declined significantly among those who contacted Council in person over the past year (index score of 68 in 2016 compared to 79 in 2015).
 - One in five (19%) residents contacted Council in person. The most popular method of contact remains telephone (26%). Only 6% contacted Council via email.

- Residents' favourite aspects of Council include Greater Dandenong's diversity (9%), parks and gardens (8%), and community facilities (7%). Suggested areas for improvement include communication (9%), parking availability (7%), sealed road maintenance (7%) and public safety (7%).
- Residents aged 18 to 34 years are generally the most satisfied resident group. This is the group Council can leverage to understand what is working, in order to further consolidate their positive views of Council.
- Conversely, Greater Dandenong City Council should pay extra attention to areas and cohorts where it is underperforming in comparison with other areas and cohorts.
 Residents aged 35 to 49 and 50 to 64 years are generally more critical of Council in 2016 compared with other resident segments.

- An approach we recommend is to further mine the survey data to better understand the profile of these over and under-performing demographic groups. This can be achieved via additional consultation and data interrogation, or self-mining the SPSS data provided or via the dashboard portal available to the council.
- Please note that the category descriptions for the coded open ended responses are generic summaries only. We recommend further analysis of the detailed cross tabulations and the actual verbatim responses, with a view to the responses of the key gender and age groups, especially any target groups identified.
- A complimentary personal briefing by senior JWS Research representatives is also available to assist in providing both explanation and interpretation of the results. Please contact JWS Research on 03 8685 8555.

Higher results in 2016	 None significant
Lower results in 2016	 None significant
Most favourably disposed towards Council	• 18-34 year olds
Least favourably disposed towards Council	35-49 year olds50-64 year olds

APPENDIX A: DETAILED SURVEY TABULATIONS

AVAILABLE IN SUPPLIED EXCEL FILE

APPENDIX B: FURTHER PROJECT INFORMATION

APPENDIX B: BACKGROUND AND OBJECTIVES

The survey was revised in 2012. As a result:

- The survey is now conducted as a representative random probability survey of residents aged 18 years or over in local councils, whereas previously it was conducted as a 'head of household' survey.
- As part of the change to a representative resident survey, results are now weighted post survey to the known population distribution of Greater Dandenong City Council according to the most recently available Australian Bureau of Statistics population estimates, whereas the results were previously not weighted.
- The service responsibility area performance measures have changed significantly and the rating scale used to assess performance has also changed.

As such, the results of the 2012 State-wide Local Government Community Satisfaction Survey should be considered as a benchmark. Please note that comparisons should not be made with the State-wide Local Government Community Satisfaction Survey results from 2011 and prior due to the methodological and sampling changes. **Comparisons in the period 2012-2016 have been made throughout this report as appropriate.**

The sample size for the 2016 State-wide Local Government Community Satisfaction Survey for Greater Dandenong City Council was n=400. Unless otherwise noted, this is the total sample base for all reported charts and tables.

The maximum margin of error on a sample of approximately n=400 interviews is +/-4.9% at the 95% confidence level for results around 50%. Margins of error will be larger for any sub-samples. As an example, a result of 50% can be read confidently as falling midway in the range 45.1% - 54.9%.

Maximum margins of error are listed in the table below, based on a population of 117,000 people aged 18 years or over for Greater Dandenong City Council, according to ABS estimates.

Demographic	Actual survey sample size	Weighted base	Maximum margin of error at 95% confidence interval
Greater Dandenong City Council	400	400	+/-4.9
Men	166	203	+/-7.6
Women	234	197	+/-6.4
Springvale	75	80	+/-11.4
Noble Park and Keysborough	174	183	+/-7.4
Dandenong	151	137	+/-8.0
18-34 years	58	144	+/-13.0
35-49 years	70	98	+/-11.8
50-64 years	103	61	+/-9.7
65+ years	169	98	+/-7.6

All participating councils are listed in the state-wide report published on the DELWP website. In 2016, 69 of the 79 Councils throughout Victoria participated in this survey. For consistency of analysis and reporting across all projects, Local Government Victoria has aligned its presentation of data to use standard council groupings. Accordingly, the council reports for the community satisfaction survey provide analysis using these standard council groupings. Please note that councils participating across 2012-2016 vary slightly.

Council Groups

Greater Dandenong City Council is classified as a Metropolitan council according to the following classification list:

Metropolitan, Interface, Regional Centres, Large Rural & Small Rural

Councils participating in the Metropolitan group are: Banyule, Bayside, Boroondara, Brimbank, Glen Eira, Greater Dandenong, Frankston, Kingston, Knox, Manningham, Maroondah, Melbourne, Monash, Moonee Valley, Moreland, Port Phillip, Stonnington and Whitehorse.

Wherever appropriate, results for Greater Dandenong City Council for this 2016 State-wide Local Government Community Satisfaction Survey have been compared against other participating councils in the Metro group and on a state-wide basis. Please note that council groupings changed for 2015, and as such comparisons to council group results before that time can not be made within the reported charts.

Index Scores

Many questions ask respondents to rate council performance on a five-point scale, for example, from 'very good' to 'very poor', with 'can't say' also a possible response category. To facilitate ease of reporting and comparison of results over time, starting from the 2012 benchmark survey and measured against the state-wide result and the council group, an 'Index Score' has been calculated for such measures.

The Index Score is calculated and represented as a score out of 100 (on a 0 to 100 scale), with 'can't say' responses excluded from the analysis. The '% RESULT' for each scale category is multiplied by the 'INDEX FACTOR'. This produces an 'INDEX VALUE' for each category, which are then summed to produce the 'INDEX SCORE', equating to '60' in the following example.

SCALE CATEGORIES	% RESULT	INDEX FACTOR	INDEX VALUE
Very good	9%	100	9
Good	40%	75	30
Average	37%	50	19
Poor	9%	25	2
Very poor	4%	0	0
Can't say	1%		INDEX SCORE 60

Similarly, an Index Score has been calculated for the Core question 'Performance direction in the last 12 months', based on the following scale for each performance measure category, with 'Can't say' responses excluded from the calculation.

SCALE CATEGORIES	% RESULT	INDEX FACTOR	INDEX VALUE
Improved	36%	100	36
Stayed the same	40%	50	20
Deteriorated	23%	0	0
Can't say	1%		INDEX SCORE 56

The test applied to the Indexes was an Independent Mean Test, as follows:

 $Z \text{ Score} = (\$1 - \$2) / \text{ Sqrt} ((\$3^{2} / \$5) + (\$4^{2} / \$6))$

Where:

- \$1 = Index Score 1
 \$2 = Index Score 2
 \$3 = unweighted sample count 1
 \$4 = unweighted sample count 1
 \$5 = standard deviation 1
- >\$6 = standard deviation 2

All figures can be sourced from the detailed cross tabulations.

The test was applied at the 95% confidence interval, so if the Z Score was greater than +/- 1.954 the scores are significantly different.

Core, Optional and Tailored Questions

Over and above necessary geographic and demographic questions required to ensure sample representativeness, a base set of questions for the 2016 State-wide Local Government Community Satisfaction Survey was designated as 'Core' and therefore compulsory inclusions for all participating Councils.

These core questions comprised:

- Overall performance last 12 months (Overall performance)
- Lobbying on behalf of community (Advocacy)
- Community consultation and engagement (Consultation)
- Decisions made in the interest of the community (Making community decisions)
- Condition of sealed local roads (Sealed local roads)
- Contact in last 12 months (Contact)
- Rating of contact (Customer service)
- Overall council direction last 12 months (Council direction)

Reporting of results for these core questions can always be compared against other participating councils in the council group and against all participating councils state-wide. Alternatively, some questions in the 2016 State-wide Local Government Community Satisfaction Survey were optional. Councils also had the ability to ask tailored questions specific only to their council.

Reporting

Every council that participated in the 2016 State-wide Local Government Community Satisfaction Survey receives a customised report. In addition, the state government is supplied with a state-wide summary report of the aggregate results of 'Core' and 'Optional' questions asked across all council areas surveyed.

Tailored questions commissioned by individual councils are reported only to the commissioning council and not otherwise shared unless by express written approval of the commissioning council.

The overall State-wide Local Government Community Satisfaction Report is available at http://www.delwp.vic.gov.au/local-government/strengthening-councils/council-community-satisfaction-survey.

APPENDIX B: GLOSSARY OF TERMS

Core questions: Compulsory inclusion questions for all councils participating in the CSS.

CSS: 2016 Victorian Local Government Community Satisfaction Survey.

Council group: One of five classified groups, comprising: metropolitan, interface, regional centres, large rural and small rural.

Council group average: The average result for all participating councils in the council group.

Highest / lowest: The result described is the highest or lowest result across a particular demographic sub-group e.g. men, for the specific question being reported. Reference to the result for a demographic sub-group being the highest or lowest does not imply that it is significantly higher or lower, unless this is specifically mentioned.

Index score: A score calculated and represented as a score out of 100 (on a 0 to 100 scale). This score is sometimes reported as a figure in brackets next to the category being described, e.g. men 50+ (60).

Optional questions: Questions which councils had an option to include or not.

Percentages: Also referred to as 'detailed results', meaning the proportion of responses, expressed as a percentage.

Sample: The number of completed interviews, e.g. for a council or within a demographic sub-group.

Significantly higher / lower: The result described is significantly higher or lower than the comparison result based on a statistical significance test at the 95% confidence limit. If the result referenced is statistically higher or lower then this will be specifically mentioned, however not all significantly higher or lower results are referenced in summary reporting.

State-wide average: The average result for all participating councils in the State.

Tailored questions: Individual questions tailored by and only reported to the commissioning council.

Weighting: Weighting factors are applied to the sample for each council based on available age and gender proportions from ABS census information to ensure reported results are proportionate to the actual population of the council, rather than the achieved survey sample.
