

Garden Waste Collection - Fortnightly

Where does all the garden waste go?

Garden waste is kept separate from other waste to prevent contamination

Garden waste is chipped

Composted to kill weed, seeds and pathogens

After 6-8 weeks it is ready to be used in horticulture

YES, YES, YES

- > Only put green waste into your green bin
- > Place green waste items in loosely so the bin can be emptied completely
- > Don't overfill your bin
- > Food waste or scraps

NO, NO, NO

- > **No** logs or stumps
- > **No** plastic bags
- > **No** plant pots
- > **No** rubble or dirt

 Save water this summer. mulch and compost on your garden to keep the moisture in and suppress weed growth.

Collection: Same day as garbage, alternate week to recycling.
